Database Project - Part 3 Database implementation

Amanda Drost, Drue Bethel, Bruce Dearing
Acadia University

November 25, 2013

General Project Information
    Project Name: Database Application

Project Description
    Contained in this folder are the build scripts to create the <u>new</u> database implementation of the project.

Project Deliverables

- an install script which will run the commands needed to build the database - INSTALL.sh;

- a script of database commands to run which will create the database and load with data - make_database.sql;

- a folder containing data to be loaded into the database - load_files/*;

- a text file documenting a run of select * TABLENAME - table_output; and

- a pdf file containing assumptions about the build of the project - assumptions.pdf;

To Build database
    `sh INSTALL.sh`
